

القاعدة الحادية عشرة

وَلَا يَفْلَحُ السَّاحِرُ
حَيْثُ أَتَى

and the magician
will not succeed
wherever he is.
20:69

People are deceived by the power of the magicians, but they will never succeed. This ayah is regarding the magicians of Firawn, when they challenged Musa عليه السلام. The magic in that time was very powerful, but Allah says they will never succeed.

Allah is the Most Powerful, don't believe in the power of anyone else.

The formation of the sentence, with the negation with the present tense of the noun, shows generalization; the magicians will never succeed, under any circumstances.

Allah described their magic as being great, but they were failures. They were experts in magic, but their powerful magic could not win against الله لا إله إلا الله. They couldn't resist the truth, so they submitted to it, by

✿ Anyone who goes to a magician, or make something happen, or harm someone, or make someone love them, they have sold their deen. The shayateen will now be the teachers of the magicians, and whoever consulted them. This shows what an evil practice it is.

✿ The shaitan beauties the magic for the one with weak faith, encouraging the person to go to the magicians. When you realize you were wrong, you must repent quickly. The mercy of Allah knows no bounds, so don't leave yourself in darkness. The truth is clear, and when you do something wrong, you feel the guilt in your heart. Allah will surely accept your repentance and forgive your sins. Don't transgress against yourself, nothing is successful without Allah.

✿ Believe in Allah and rely upon him, then the magic will become tiny in your heart, and disappear. Your belief will make the plot of the plotters so insignificant.

✿ The magicians are the most miserable people, because they are trying to defy Allah, disobeying Him, and turning away from His remembrance. They sell their souls to the shaitan, so they are unhappy and unsuccessful.
